Resources ★

Teaching Resources

AIS recognizes that education is fundamental to the field of information systems, and therefore seeks to provide valuable pedagogical resources to its members.

In the coming months, the association will be posing case studies, course syllabi, and the like for its members to use when designing their own courses.

If you are interested in contributing to this page, please send an email to the [AIS Communications Director](#) with the following information: the type of material being sent (case study or syllabus), the topic to which it is most relevant (all topics are listed below), and the actual item attached as a PDF or Word doc.

areas of information systems research:

Foundations of Information Systems

The association is currently collecting teaching materials related to these

IT Project Management

Human-Computer Interaction
